Position of the Union

The Vice President of the Sindicato dos carriage of Manaus, Elsa Oliveira, has spoken about the stoppage of the employees of the Global Green on Friday morning, saying that it is a splinter group of the movement of the category. "This is a group that thinks it can strike any way and at any time. They think they will get along well. We're not going to support that kind of thing," said Oliveira.

Second Vice President, workers who crossed his arms are being commanded by a Commission created by Mayor Artur Neto to negotiate directly with the owners of the company, over the heads of the syndicate. According to Elsa, the claim of the strikers is being judged this Friday at the Court of the work and not reason for the outage.

"I wanted to see the Mayor (Artur Neto) go in the garage to resolve the matter. Since who is spearheading this (shutdown) is such a Commission created by him. If we were we in the Union, he would be calling us hooligans. But how is his crew, he doesn't even show up there to say anything," said Elsa.

"In relation to what they are claiming on standstill, is on trial now. I'm here in court precisely following the trial of collective bargaining, which was supposed to happen in May and was rescheduled for today. They claimed that it was not at the (bargaining) agenda. There is no reason to have done this (shutdown)," concluded the trade unionist.

The city has not yet ruled on the road ' strike. About 250 thousand users of urban mass transit in the capital are being hampered by lack of buses.

### **Political scientists classify groups that call for military intervention as unimpressive To listen to experts for criticism, there is no risk of a new coup in the current political climate in the country**

Manaus (AM), November 10, 2014

Protest by the impeachment of President Dilma Rousseff held on 1st on avenida paulista in São Paulo (SP). Other capitals also had demonstrations (Fernando Zamora-AE)

In the year when the military coup of 1964 completed 50 years which resulted in 20 years of dictatorship, the Brazil attended, last week, a series of demonstrations, which, among other things, called for a new military intervention. To listen to experts for criticism, there is no risk of a new coup in the current political climate in the country.

Professor at the Federal University of Amazonas (Ufam), doctor in sociology, Marcelo Seraphic, stated that the "apparent bias" that occurred in the election favored the manifestation of reactionary groups. "That were always present in the reality of the country, but now found themselves in political conditions to express themselves in a more open," added the professor.

For Marcelo Seraphic, two theses guide these groups. A more conservative argues that the Brazil was undergoing a process of "bolivarização or venezuelização". "Hyperbole, exaggeration, because we are far from that," he said.

According to the sociologist, the other is that Brazil is on the verge of a coup. "I believe that these two guidelines do not reflect the protests we've seen in the country since 1994 and that have intensified in the past four years because of the crisis and how the Government responded to her. People took to the streets calling for the guarantee of their basic rights. What we see is an embarrassment of Government in taking on these causes and a base that does not keep its commitments," he said.

The subject is gaining space among the most diverse sectors of society. The entrance of the University Hospital Doctor Miguel Riet Correa Junior was debated in a public hearing before the Board of Aldermen on Thursday night (26) and, on Friday, students and staff went to the campus of the Universidade Federal do Rio Grande (Furg) protest.

The reason for the mobilisation comes into agreement with what the National Front Against the privatisation of health argues: the entry into the Brazilian hospital services (Ebserh) would be a way to privatize the health system. To aggravate the situation about 500 employees of HU would be excused from its activities. The University Administration claims that the process is not understood as a model of privatization, since the Administration would be of a public company.
