

Washington and save the planet!

No USA import of
Canadian oil
tarsands!

STOP

join us - fight Washington's oil & climate politics!

**at the USA's Durban Consulate – 303 Pixley Kaseme St (West St) –
for a peaceful sidewalk picket: Wednesday, 31 August, 4-5pm**

- The Obama Administration is still waging Bush-era oil wars in the Middle East and North Africa.
- It is promoting deep-sea oil drilling in spite of BP's Gulf spill, as well as filthy gas fracking and nuclear energy.
- It refuses to make substantive emissions cut commitments.
- In multilateral climate talks, at the Copenhagen 2009 COP15 it "blew up the UN" (Bill McKibbin, 350.org), and at the 2010 COP16 in Cancun, promoted carbon trading and let the World Bank run climate finance.
- To get its way, WikiLeaks disclosures of US State Department cables prove it resorts to bribery and bullying.
- For the December 2011 COP17 at the Durban ICC, top US State Dep't negotiator Todd Stern is refusing to save the Kyoto Protocol's binding emissions cuts and allow a new post-2012 commitment round.
- Durban will be known as the place Kyoto -- and prospects for a stable climate -- died.
- Stern has promised *there will be no overall climate deal in Durban!* Stern is also reneging on US promises in Copenhagen for a \$100 billion Green Climate Fund. He rejects the very idea of paying the US climate debt to Africa, and is passing the buck to for-profit financial markets.
- **Hundreds of US citizens and Canadians arrested at the White House oppose import of filthy Tar Sands oil. They have a chance to win if we show solidarity!**

protest Todd Stern!
