Maputo social situation about water supply and sanitation

- ▶ 75% of the population in Maputo lives in informal areas ,most of them are unemployed which live by the informal economy. As a result it is estimated that 62% live below the poverty line and 28% suffer from chronic malnutrition.

- ▶ Only 31% of the urban population currently has access to safe drinking water and proper sanitation. Most water comes from public standpipes as only 9% have house connections, while only 4% are connected to sewers.

Needs and availability of water into Maputo with the existing infrastructure.

Water supply and price

- ▶ FIPAG (Patrimony Fund and the Water Supply).

1st. Step for acquiring water for consumers first class.

Paid contract,

Counter,

Faucet,

Pipe for connection.

- ▶ 2. Step
- ▶ FIPAG workers, make the pipe and water connection which ought to make the monthly payment of 1980 Metical by 220m³.

Low-income consumer.

- ▶ For acquisition of water they must:
- ▶ travel long distances,
- ▶ forming a row and pay 5 Metical for 20 liters of water.
